Contents of Volume 89 2001

Achdou Y, Tchou N: A finite difference scheme on a non commutative group 401
Allaire G, Castro C: A new approach for the optimal distribution of assemblies in a nuclear reactor 1
Apel T, Nicaise S, Schöberl J: Crouzeix-Raviart type finite elements on anisotropic meshes 193
Aranda E, Pedregal P: Numerical approximation of non-homogeneous, non-convex vector variational problems 425
Axelsson O, Gololobov SV: Stability and error estimates for the θ-method for strongly monotone and infinitely stiff evolution equations 31

Babuška I, Feistauer M, Šolín P: On one approach to a posteriori error estimates for evolution problems solved by the method of lines 225
Bachelot A, Bounhoure L, Pujols A: Couplage éléments finis-potentiels retardés pour la diffraction électromagnétique par un obstacle hétérogène 257
Benzi M, Frommer A, Nabben R, Szyld DB: Algebraic theory of multiplicative Schwarz methods 605
Beśka M, Dziedziul K: Asymptotic formula for the error in cardinal interpolation 445
Bini DA, Gemignani L, Meini B: Factorization of analytic functions by means of Koenig's theorem and Toeplitz computations 49
Bounhoure L → Bachelot A
Brezzi F, Fortin M: A minimal stabilisation procedure for mixed finite element methods 457

Casarin MA: Schwarz preconditioners for the spectral element discretization of the steady Stokes and Navier-Stokes equations 307
Castro C → Allaire G
Castro M → Parés C

Chalons C, LeFloch PG: A fully discrete scheme for diffusive-dispersive conservation laws 493

Dai Y-H: New properties of a nonlinear conjugate gradient method 83
Després B: Lagrangian systems of conservation laws 99
Dziedziul K → Beśka M

Feistauer M → Babuška I
Formaggia L, Perotto S: New anisotropic a priori error estimates 641
Fortin M → Brezzi F
Frommer A → Benzi M

Gemignani L → Bini DA
Gololobov SV → Axelsson O
Grüne L, Kloeden PE: Higher order numerical schemes for affinely controlled nonlinear systems 669

Havu V, Pitkäranta J: An analysis of finite element locking in a parameter dependent model problem 691

Jovanovic BS, Vulkov LG: On the convergence of finite difference schemes for the heat equation with concentrated capacity 715

Kanzow C: Strictly feasible equation-based methods for mixed complementarity problems 135
Kloeden PE → Grüne L

LeFloch PG → Chalons C
Li Z: A mesh transformation method for computing microstructures 511
Liu W, Yan N: Quasi-norm a priori and a posteriori error estimates for the nonconforming approximation of p-Laplacian 341

Lutterkort D, Peters J: Tight linear envelopes for splines 735

Macías J → Parés C
Malajovich G, Zubelli JP: Tangent Graeffe iteration 749
Matos AC: Recursive computation of Padé–Legendre approximants and some acceleration properties 535
Meini B → Bini DA
Mikula K, Ramarosy N: Semi-implicit finite volume scheme for solving nonlinear diffusion equations in image processing 561

Nabben R → Benzi M
Nicaise S → Apel T

Parés C, Macías J, Castro M: Duality methods with an automatic choice of parameters 161
Pedregal P → Aranda E
Perotto S → Formaggia L
Peters J → Lutterkort D
Pitkäranta J → Havu V
Pujols A → Bachelot A

Ramarosy N → Mikula K

Sangalli G: A robust a posteriori estimator for the Residual-free Bubbles method applied to advection-diffusion problems 379
Schöberl J → Apel T
Šolín P → Babuška I
Szyld DB → Benzi M

Tchou N → Achdou Y
Thomée V, Wahlbin LB: Stability and analyticity in maximum–norm for simplicial Lagrange finite element semidiscretizations of parabolic equations with Dirichlet boundary conditions (*Erratum*) 191

Vecchio A: Volterra discrete equations: summability of the fundamental matrix 783
Vulkov LG → Jovanovic BS

Wahlbin LB → Thomée V
Wensch J: Extrapolation methods in Lie groups 591

Yan N → Liu W

Zubelli JP → Malajovich G
